# RANA RABEES

HI, I'M WEB3.0, WEB2.0, METAVERSE, AI, IOT, BLOCK CHAIN, SERVER LESS API, WEB, APP, GAMES, MERN, MEAN, REACT NATIVE DEVELOPER.

## *About Me*

Hi, my name is **Rana Rabees** and I am a **highly ambitious**, **self-motivated**, and **driven Developer**, **Coder** and **Programmer** working for **RanaVerse**.

I started my career in 2019 and have been working in the field ever since. I am passionate about creating things. My love for creation began at an early age, where I would often be found sketching and drawing. Though I haven't had much time for sketching in the past two years due to my studies in software development, I have found that my passion for design has transformed into a digital form.

My interest in web development began when I discovered my love for designing websites and creating intuitive user experiences. Since then, I have been developing modern and clean websites using frameworks such as **Next.js**, **React.js** and **Node.js** . I am also well-versed in **object-oriented programming**, **data structures** and **alogrithms**, and continuously strive to improve my knowledge in the field of **user experience design**.

As a recent graduate, I specialize in full stack development, with expertise in languages such as **Html5 Css3, Javascript, Typescript, Python, Object - C, CSharpScript, Kotlin, C++, Java, JSON, XMI, ASP, Bablel, Python, Numpy, Panda, Keras, TensorFlow, Scikit Learn, Dart, C, C++, Php, Ruby, Swift, Tailwindcss, JQuerry, Sass, SQL, MySQL** and so many others **Languages**, **FrameWorks**, **Libraries** Remaining Now. I have a strong foundation in creating websites and focus on providing the best user experience through intuitive design.

I have a wide range of hobbies and passions that keep me busy. From Reading/Creating new blogs, Making Dynamic Websites, Building Mobile IOS Apps, Creating Games(2D 3D), Making YouTube videos of new Skills/Experiences, I am always seeking new experiences and love to keep myself engaged and learning new things.

I believe that you should **never stop growing** and that's what I strive to do, I have a passion for technology and a desire to always push the limits of what is possible. I am excited to see where my career takes me and am always open to new opportunities.

Thank you for taking the time to get to know me a little better. If you have any questions or are interested in working together, please don't hesitate to reach out.
